

Vivek Almal

5513585643 | vivek.almal99@gmail.com | Jersey City, NJ

Education

Stevens Institute of Technology | Hoboken, NJ

MS in computer science | 05/2024

GPA : 3.66

CMR institute of technology | kandlakoya, Hyderabad

Bachelor's in civil engineering | 05/2020

Experience

Saven nova technologies | Madhapur, Hyderabad

Assistant System Engineer | 06/2021 - 08/2022

Built and maintained REST APIs supporting core business workflows, improving system efficiency and reliability

- Developed reusable React components to enhance UI consistency and reduce development time
- Wrote unit tests achieving ~90% code coverage, improving application stability and reducing defects
- Collaborated on backend development using Python and Django, handling business logic and database interactions
- Participated in deployment on company cloud infrastructure and supported production readiness

Projects

Stack Overflow Clone (Full-Stack Web Application)

Tech: Django, Django REST Framework, Python, JavaScript, HTML, CSS, PostgreSQL, Google OAuth

- Built a full-stack Q&A platform with posting, answering, voting, and threaded discussions
- Developed RESTful APIs using Django REST Framework for questions, answers, comments, and voting
- Implemented authentication using session-based login and Google OAuth
- Designed features including tagging, search, pagination, and bookmarking to improve usability and performance
- Created user profile dashboards displaying activity metrics (questions, answers, engagement)
- Modeled relational database schema for users, posts, comments, votes, and tags ensuring data integrity

HealthyByte (Nutrition Web Application)

Tech: PHP, MySQL, Apache, HTML, CSS

- Built a personalized nutrition platform providing meal recommendations based on user health data
- Developed backend logic for user input processing, authentication, and data storage
- Designed user-friendly interfaces for capturing dietary preferences and generating customized plans

Skills

Languages: Python, Java, JavaScript, SQL

Frontend: HTML, CSS, React, Tailwind CSS

Backend: Django, Node.js, Express.js

Databases: PostgreSQL, MySQL, MongoDB

Tools: Git, Postman, VS Code
